COURSE CODE: e809_1

Understanding research with children and young people

<https://www.open.edu/openlearn/health-sports-psychology/understanding-research-children-and-young-people/content-section-overview>

Course summary

The course covers why it is important to include children and young people in research about their lives. It explores what it means to carry out research with children and young people. The course gives an insight into the fundamental rights of children and young people contained in the UNCRC, it provides a framework which can underpin all research with and by children, to help start to formulate research project ideas and consider how to go about carrying them out.

Learning outcomes

By completing this course, the learner should be able to:

- Understand the value of including children and young people in research about children's lives by acknowledging their experience and expertise
- Have an insight into the challenges and opportunities involved in research with and by children and young people and the benefit of taking a principle-based approach
- Understand how the principles of trust and respect are the starting points for developing a sound and feasible research study with and by children and young people
- Understand the value of taking a children's rights-based approach alongside ethically sound principles when undertaking research with and by children and young people.

Completed study

The learner has completed the following:

Session 1

Session 1: Why do it?

Session 2

Session 2: What is research with children and young people?

Session 3

Session 3: The TRREEE principles

Session 4

Session 4: Time to get started.
